FURTHER INFORMATION

SOFTWARE SCREENSHOTS

The screenshot displays the SAP Item Tracing interface. The breadcrumb navigation shows: Finance and Operations > Product information management > Products > Released products. The main menu includes: Save, New trace, Tracing, and Options. A secondary menu lists: Item (Batches, Transactions, Pending transactions), Sales (Customers, Shipped sales orders, Not shipped sales orders), Purchase (Vendors, Purchase order lines), Production (Production orders, Pending orders), Quality (Quality orders, Non conformances), Export (Export), and Print (Shipped to customers). The main content area is titled "Item tracing" and shows "LYS, Backward, Batch number=2019-008". Below this, a "Trace" section provides navigation options: View details, On-hand inventory, Go to traced line, Go back, Trace from node, and Production picking list. The trace data is as follows:

Item	Quantity	Date	Site	Warehouse	Location	Inventory Status	License Plate	Batch Number
LYS / 2019-008	100,880.00							
LYS • Sales order 001761	-10.00	9/24/2019	5	51	LP-001	Available	LYS-2019001	2019-008
LYS • Work USMF-000168	900.00	3/25/2019	5	51	LP-001	Available	LYS-2019001	2019-008
LYS • Work USMF-000168	-900.00	3/25/2019	5	51		Available	LYS-2019001	2019-008
LYS • Work USMF-000168	900.00	3/25/2019	5	51	51	Available	LYS-2019001	2019-008
LYS • Work USMF-000168	-900.00	3/25/2019	5	51	PRODREC	Available	LYS-2019001	2019-008
LYS • Production 000002	900.00	3/25/2019	5	51	PRODREC	Available	LYS-2019001	2019-008

Below the trace data, there are sections for "General", "On-hand inventory", and "Batch".

Track and trace is critical to ensure the integrity of products as they move through the value chain.

Merit for Life Science enables you to recall trace (both forward and backward) any product at any time, quickly and completely — from the finished good to each raw material used — and every step in between.

Merit for Life Science helps you better manage inventory shelf life, an ongoing challenge for pharmaceutical manufacturers. With embedded PowerBI, you can proactively manage inventory, control assets tied up in raw materials, intermediate product, and finished goods product inventory with expiration dates per lot. Ensure lots are used before they expire or before the window of time required to get them out to customers closes, and track and perform the related retest.

The Electronic Batch Report process simplifies and automates the creation of a document that includes all details in a single report. This eliminates the need for users to run multiple reports and manually assemble the summary.

PRODUCTION REPORT

Lot	Quantity	Status	Value
0001	1000	Released	1000.00
0002	1000	Released	1000.00
0003	1000	Released	1000.00
0004	1000	Released	1000.00
0005	1000	Released	1000.00
0006	1000	Released	1000.00
0007	1000	Released	1000.00
0008	1000	Released	1000.00
0009	1000	Released	1000.00
0010	1000	Released	1000.00

Merit for Life Science extends standard master planning functions to create a full projection of future-dated anticipated Quality Orders. This provides key information for users responsible for planning or scheduling quality testing resources and for anticipating potential supply-chain bottlenecks caused by backlog.

My view

Lot	Quantity	Status	Value
0001	1000	Released	1000.00
0002	1000	Released	1000.00
0003	1000	Released	1000.00
0004	1000	Released	1000.00
0005	1000	Released	1000.00
0006	1000	Released	1000.00
0007	1000	Released	1000.00
0008	1000	Released	1000.00
0009	1000	Released	1000.00
0010	1000	Released	1000.00

Approved vendor list | 000386 - SODIUMHYDROXIDE/MAO

My view

Item number	Product name	Item classification	Vendor name	Effective	Expiration	Workflow status	Vendor classification
000386	Sodium hydroxide (NaOH)	10 R&O					
1001	BoReX			9/18/2020	12/31/2020	Pending approval	10 R&O
1003	Alfa Aesar Company			4/20/2020	1/1/2021	Not submitted	10 R&O
10279	Alfa Aesar			4/20/2020	4/19/2021	Approved	10 R&O

Pharma and biotech manufacturers rely heavily on suppliers for the provision of materials and services. With Merit for Life Science, you can configure and maintain the classification level of both products and vendors.

Track and qualify vendors for items before ordering raw materials from them, track all interactions including nonconformances, proactively manage those approaching recertification, and automatically unapproved vendors if changes in classification level are made.
